

# STEP ON IT!

You can use the step-by-step method to draw anything. Just start with the biggest shapes and end with the details. If something looks too complicated to draw, try making it with your own step-by-step.

Your choice goes here.

teddy bear

① Start with a nice, round number 8.

② Draw skinny ovals where the paws are going to end (not too far away or your bear will have skinny legs).

③ Connect the ovals to the big circle with lines.

④ Finish with the details - eyes, ears, nose, mouth, and stitching!

frog

① Start with an 8 on its side.

② Draw a football under the circles.

③ Make two curves under the football.

④ Draw four lines close together for the front legs.

⑤ Add frog feet.

⑥ Don't forget the face!
