

# PET PAGES

Here are the basic step-by-steps I use to draw dogs and cats. You can follow them or invent your own.

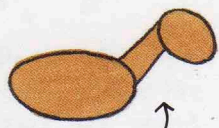

dog, side view

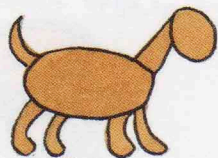

- ① Make an oval for the body.

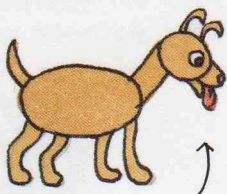

- ② Make a smaller oval above it and to the side for the head.

- ③ Attach the head to the body with two lines.

- ④ Add legs (four of them) and a tail.

- ⑤ Here's the tricky part - give your dog a face and ears. Add a tongue hanging out if you like.

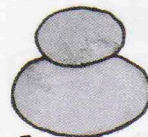

Your dog goes here.

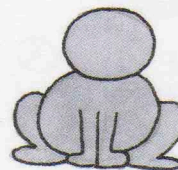

dog, front view

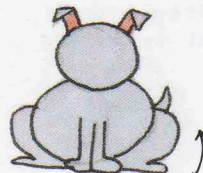

- ① Draw an oval for the face.

- ② Put a bigger oval under it like a squashed 8.

- ③ Add legs to the front and sides (like for your frog).

- ④ Draw a triangle flopped over a rectangle for each ear. Add a triangle tail.

- ⑤ Now give your pug a face!
